THE SOLUTION

One Product for Every Purpose

The benefits of a **truly standardized** product:

Consistent Care

- Product standardization helps create a **more consistent and less complex clinical practice**¹
- Product standardization limits potential for product misuse, **increasing protocol compliance and reducing patient risk**¹

Cost Savings

- Each year, healthcare facilities in the U.S. spend **\$542 million** on patient cleansing alone.²
- In a recent survey, 96% of hospitals agreed that standardizing products would **reduce hidden costs**³
